Atty. Docket No.: 007744.P002 1 of 10 MAY 2 5 2007 start Generate the ambiguities ('undominated 510 profile pairs') of the APS to be fully calibrated and/or the ambiguities of the restricted group of alternatives to be ranked or the 'best' one chosen from. Resolve the ambiguities by performing a comparative assessment of profiles, comprising 520 the ordinal pairwise ranking of profile pairs, including identifying profile pairs that are implicitly ordinally pairwise ranked as corollaries of ordinal pairwise rankings performed. Solve the system of explicitly resolved 530 inequalities/equalities to obtain the point values and/or a ranking of the restricted group of alternatives or the

identification of the 'best' one.
